

Instructions for twice 24 hours Urine Collection

We ask you to read and follow these instructions carefully.

You have received two canisters and a bottle of paraffin for the urine collection, in which you will please collect your urine twice during 24hrs.

First 24 hours urine collection with paraffin oil

Time: Start the 24 hours urine collection with paraffin at least 48 hours before the next ward round. (e.g. Next ward on Wednesday 22.02.2017, 08:00h. Start Urine Collection on Monday, 20.02.2017, 07:00h)

Start 1st Urine Collection

1. Empty the bladder in the toilet.

2. Write down the Date and Time here: (e.g. Monday, 20.02.2017, 07:00h)

Date: _____ Time: _____

3. From now on collect all urine portions during 24hrs in the container with the label "**Paraffin/Thymol**".

Conclusion 1st Urine Collection

4. After 24h collection empty your bladder one last time in this canister.

5. Write down the date and time here (e.g. Tuesday, 21.02.2017, 07:00h)

Date: _____ Time: _____

6. Seal canister well and store in a cool place.

Second 24 hours urine collection native (without additives in the canister)

Start 2nd Urine Collection

1. You have finished the 1st 24 hours Urine Collection and are ready to continue the collection in the second canister. The endpoint of the 1st collection corresponds with the starting point of the 2nd collection (e.g. Tuesday, 21.02.2017, 07:00h)

Date: _____ Time: _____

2. From now on collect all urine portions during 24hrs in the container without label.

Conclusion 2nd Urine Collection

3. Add the last Urine portion to this canister.

4. Write down date and time of addition of this last urine portion (e.g. Wednesday, 22.02.2017, 07:00h)

Date: _____ Time: _____

5. Seal canister well and store in a cool place. Take both canisters and these papers along to your visit.

General notes:

- Avoid skin contact with the white powder (thymol).
- Label both urine canisters with the date of collection.
